

DATA GOVERNANCE TRAINING BENEFITS

For You

- “The Q&A provides some really good insights into areas you may have missed, alternative approaches and challenges you may not yet have encountered. Understanding how other people have approached these things is a really useful tool to optimise your own method.”
- “From a skills perspective it gives you an understanding of the what’s & hows of Data Governance. I don’t think you can underestimate how useful it is to have industry agnostic fundamentals in mind when approaching Data Governance so you aren’t ‘blinded’ by your own domain knowledge.”
- “Having a safe space to talk about implementations and asking for ideas”
- “For those initiating a Data Governance program, this is a great place to start”
- “It gave me the knowledge to know what to do, (and roughly who to pick), and some pitfalls to expect”

For Your Company

- “The course has given me “food for thought” about which issues I should prioritize in my company and how to convince other stakeholders to support my DG initiative by showing them what benefits they could gain if we join forces to govern data. This was proven even more impactful when we started talking about data quality”
- “Knowing the sequential steps to take and knowing what is/isn’t data governance”
- “Makes data governance both accessible and practical for all”
